

News update from Dave McGuire February 2016

Meeting a desperate need.

In January 2016, a family in Danes, Romania, had their home completely destroyed by fire. Thankfully, no-one was hurt.

They moved in temporarily with the grandparents that meant four adults and three children were living in one room!

It is very cold in January in Romania. So it was important to start work on rebuilding a home for them as soon as possible.

Some funding from AMEN enabled Dave to start work on this project straight away. He was able to build a two-room house fitted with a door, two windows and a safer heating system.

Money from a church in the States helped to complete the build and fund some of the fittings. A Baptist church in a nearby town provided much of the furniture.

The family are now safely back in their new home. Praise the Lord.
