

**INVESTING IN THE PRESENT,
CHANGING THE FUTURE!**

Everything is very challenging because of this corona virus outbreak! We believe it is a good moment to share with you a couple of real life stories from our work called “One life at a time!”.

Adriana is one of the girls from a very poor village, where Perspective supports the young people to stay in school, by offering them transport to school, an afterschool program and a cooked meal. Adriana is the first girl after more than 5 years from the community who is in the 7th grade! The maximum was 4 grades! Her attendance was checked at school and in almost 7 months of school she had just 5 missing days and this with real justification: sick or family issue! The teachers are very proud of her efforts and she has become a role model to the group!

The Widows Support Group started because one of the ladies asked and organized everything herself! I used to say, “I don’t have space yet for that and I don’t know the widows in the community!” After one day, she had organized everything and contacted first 15 ladies and all said “Yes, we want to be part of a weekly meetings with Perspective Danes project!” About 12 widows have continued to meet every week and is very important to them

THE NEED IS REAL!

For the kids and families from our programs is not easy! For the ones who used to make income from the landfill, they cannot do it anymore because of the new regulations relate with COVID19 virus! and No daily jobs.

**We are here for them
Thank You
Liviu**
