

## COVID-19 Food distribution - Report from David McGuire, Romania

David McGuire, with different team of church volunteers, has so far given food to the poor in 23 different villages in the locality. Local churches in each village continue to work with this blessing in their place and across church denominations for a common cause – ‘providing food and sharing Jesus’

In the last month, David and his volunteer church teams have given out 815 food bags that has blessed 815 families (bringing the total distributed since lockdown to 1840 food bags)

On 5<sup>th</sup> May, David went with a team of volunteers from 2 different churches. They worked together and packed up 220 food bags. These bags contained basic food items such as: rice, flour, pasta, polenta, cooking oil, margarine, baked beans and biscuits.

The team's desire is to serve the Lord and bless people – they delivered 220 bags of food to hungry families. The team said ‘This is a blessing from the Lord, for those who don't have food, so that they can have something to eat’

As they went around the village, they had opportunities to pray for people and many received healing from Jesus. One person became a Christian

David would like to thank all those who have donated money to buy food.

A few days later, in another village 170 bags of food were delivered to 170 families. The team of volunteers worked really well together to be a blessing to the people in the village: as well as taking delivering the food packages to the families, the team shared about God's love with people. They had opportunities to pray for people and many of them received healing from Jesus. Ten people received Jesus into their lives.
