

Philippines Flood Relief

In the midst of Covid-19, a recent typhoon in the Philippines caused the largest river in the country to break its banks. While some were flooded so badly they had to climb onto the roofs of their houses, others lost their livelihood as their rice harvest was completely ruined. However, Zaldy and Ria, AMEN partners, got police permission to travel for 12 hours to the area and distribute relief packages, gospel literature and present the gospel to more than 200 families. They also helped 20 families with roof repairs. Visit www.amentrust.co.uk to learn more.
