

Update from Naphtali at Mission Field House in Nigeria.

Training

These photos are the recent training I did in Kogi State (Egbe) for village church planters. This was a great time but very stressful. We travelled for 12 hours on a very bad road network. We thank GOD it went well and encourage with zeal to begin planting churches in the villages.

They were asking me if I could stay with them there. We await testimonies.

Agricultural Project 2026

We thank God for the partnership on the Agricultural project.

33 people benefited from the project ranging from maize, groundnut and rice with herbicides for spraying on the farm. They were quite excited, pouring prayers on donors! Part of the harvest will be given to the elderly, who cannot farm.

Most of the beneficiaries are those affected by insurgents of the attacks from herdsmen. We're so grateful for the efforts of AMEN supporters. See pictures below:
